*For Sarah,
from just a sampling of the many colleagues/friends
whose work you've influenced and inspired.*

Table of Contents

Part I. About Sarah

Sarah VanWagenen's Curriculum Vitae	i
Sarah as collaborator, researcher, fellow student, inspiration. . .	v

Part II. By Sarah

The morphologically organized mental lexicon: Further experimental evidence <i>Sarah VanWagenen</i>	1
Quantifying parsing complexity as a function of grammar <i>Sarah VanWagenen, Jonathan Brennan & Edward P. Stabler</i>	31
Asymmetries in priming of verbal and nominal inflectional affixes in Russian <i>Sarah VanWagenen & Katya Pertsova</i>	49

Part III. For Sarah

Bind locally indeed <i>Byron Ahn & Dominique Sportiche</i>	61
The syntax of mirror principle violations in Wolof <i>Leston Buell, Mariame Sy & Harold Torrence</i>	71
Interpreted Learning: A framework for investigating the contribution of various information sources to the learning problem <i>John Case, Jeffrey Heinz & Gregory M. Kobele</i>	103
The case of Chelsea: The effects of late age at exposure to language on language performance and evidence for the modularity of language and mind <i>Susan Curtiss</i>	115
Learning adjuncts <i>Meaghan Fowlie</i>	147
Beyond the apparent: Cognitive parallels between syntax and phonology <i>Thomas Graf</i>	161
Who <i>else</i> but Sarah? <i>Jesse A. Harris</i>	175
A subclinical study of the cognitive resources underlying scalar implicature: A focus on scalar adjectives <i>E. Matthew Husband</i>	189
Does morphology drive syntax? Evidence from L1 acquisition <i>Nina Hyams</i>	213

Specifying locatives in Chickasaw <i>Pamela Munro</i>	229
A brown-eyed girl <i>Andrew Nevins & Neil Myler</i>	243
Memoization in top-down parsing: Analysis, attention, memory and reanalysis <i>Edward P. Stabler</i>	259
Processing (the) events: lexical and structural ingredients of inner aspect <i>Linnaea Stockall & E. Matthew Husband</i>	275
The effect of EEG biofeedback on hemispheric specialization for language <i>Eran Zaidel & Anat Barnea</i>	293
