

Phonetic Change Types for Midterm

In the section identifying types of phonetic change, you are not responsible for anything that I or the textbook mentioned that is **not** on this list.

assimilation (progressive and regressive: for full credit you must identify which)

palatalization

dissimilation (including dissimilatory loss!)

apocope

syncope

aphaeresis

epenthesis

excrescence

prothesis

anaptyxis

compensatory lengthening

metathesis
